Cabin Creek Exit 63 Hwy 90, Snoqualmie Pass, WA

Sunday, January 26

9:30 A.M. First Wave start

15K, 5K, then shorter distances, Freestyle Technique

Wave starts by speed and distance

15K is 3 laps

<http://www.kongsbergers.org>

Forecast/Conditions: Soft snow conditions after three days of rain with temperatures not dropping below freezing in days leading up to the event. A 60 percent chance of rain during event with temperature around 36 on a 40" base.

Glidewax: Washington Cup Competitors no HF waxes. For others, apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin. Washington Cup Competitors should substitute Performance Yellow for High Performance Yellow.

Structure: A wet structure or covering other grinds with one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
