12.5K Men, 10K Women

Pursuit format

See website for details including Wash Cup wax rules

<http://www.wabiathlon.org>

Forecast/Conditions: Overnight low of around 27 rising to around 29 at race start. Cloudy skies with an 80 percent chance of snowfall during event with a high of 31 expected by race completion. Platform should be a bit firmer due to additional grooming on Saturday night.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply Performance or High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit for 1 hour to overnight in a warm and dry environment, polish with the Polishing Brush Liquid Paraffin. (Performance wax for Juniors and High Performance wax for others.)

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing Hot Wax or before spraying Liquids will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
