Wave start

Point-to-point

<https://bouldermountaintour.com/>

Forecast/Conditions: Friday night low in the low to mid-20s. Saturday start temperature around 30 with partly cloudy skies. Chance of light wind with occasional gusts up to 20 mph.

Glidewax: For Waves 1-3, apply Performance Blue Hot Wax, scrape and brush, then apply High Performance Red Hot Wax/High Performance Blue Hot Wax mixed 1:1, scrape and brush. For Waves 4 and later, apply Performance Blue Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Structure: A universal structure covered by one pass with the Blue Structurite tool (Waves 1-3) or Red (Waves 4 and later) after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Doug Bernard, Toko Tech Team member.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
