<http://nensa.net> for late updates on race location change or cancellation due to weather.

**Forecast/Conditions:** Overnight low of 35, rising during the day to 50 with increasing rain.

**Glidewax:** Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green. Then while the Green is still warm apply Nordic Klister Yellow.

**Structure:** A universal or warm structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

**Racing - Service**

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
