

WAX RECOMMENDATION

Freeman Frost White Mountain

Jackson Ski Touring Center, Jackson, NH

Sunday, January 26

9:30 A.M.

22K, Classic

Mass start

1 loop

<http://jacksonxc.org>

Forecast/Conditions: Snow starting Saturday afternoon and continuing overnight. Snow changing to rain on Sunday morning with temperatures rising through the upper 30s.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green. Then while the Green is still warm apply Nordic Klister Yellow very thin. Could also be a good day for zeros, [hairies](#) or skins. If using skin skis, see our [skins treatment options](#) for best results.

Structure: A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
