

WAX RECOMMENDATION

TOKO[®]

Krazy Klassic

Huron Meadows Metropark, Brighton, MI

Sunday, January 26

10 A.M.

12K, Classic

Mass start

Multiple laps on 4K loop

<http://nordicskiracer.com>

Forecast/Conditions: Overnight low of 33 with a 30 percent chance of snow. Temperature at start of 32 with a 10 percent chance of snow during race. Rain and snow mix the previous two days should make for a firm, wet track.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply alternating layers of Nordic GripWax Red and GripWax Yellow, corking between layers. Final layer should be Red. If using skin skis, see our [skins treatment options](#) for best results.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
