Ishpeming to Marquette, MI

Saturday, January 25, 2020

9 A.M. 51K Classic, 9:55 A.M. 51K Skate

11:45 A.M. 24K Classic, 12:30 P.M. 24K Skate

Wave starts, All point-to-point courses

<https://www.noquemanon.com/>

**Forecast/Conditions:** Friday night a 50 percent chance of snow. Cloudy, with a low around 29. New snow accumulation of less than one inch possible. Saturday a 40 percent chance of snow with steady temperatures 30-32 through the day. Expect fresh snow with relatively high moisture content in the days leading up to the event to be machine worked and tilled in to a substantial base.

**Glidewax:** Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Black Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax Yellow, corking between layers. If using skin skis, see our [skins treatment options](#) for best results.

**Structure:** A universal structure covered by one pass with the Yellow Structurite tool covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
