

WAX RECOMMENDATION

Sisu Ski Fest

ABR Trails, Ironwood, MI

Saturday, January 11

9:30 A.M. 30K Classic and Skate

11 A.M. 15K Classic and Skate

Wave starts

<http://www.sisuskifest.com>

Forecast/Conditions: Overnight low of 6F, temperature at start will be 10F. Snow will be high moisture and packed firm. Expect some overcast skies with wind.

Glidewax: Apply Performacne Blue Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on High Performance Liquid Blue, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Blue, corking between layers. For skiers in earlier waves, apply one layer of GripWax X-Cold over top.

Structure: A universal grind covered by one pass with the Blue Structurite tool after scraping and brushing the HP layer or before spraying on the HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
