

# WAX RECOMMENDATION

## Snekkevik

Nine Mile Forest, Wausau, WI

Saturday, January 11

Races starting at 9:30 A.M.

Adult Skate and Classic races & HS/MS Classic races

<http://wausaunordic.org/snekkevik/>

**Forecast/Conditions:** A 30% chance of snow Friday night with cloudy skies and an overnight low around 11. Race time temperature should be in the mid-teens with mostly cloudy skies.

**Glidewax:** Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax/High Performance Red Hot Wax mixed 1:1, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply several layers of Nordic GripWax Blue, corking between layers.

**Structure:** A cold/fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
