

WAX RECOMMENDATION

TOKO[®]

Wisconsin Biathlon Cup Race #2

Blackhawk Ski Club, Middleton, WI

Sunday, January 5

10 A.M. 12K Open Race, 11:15 A.M. 5K Novice Race

Skate

Mass start, multi-lap

<http://www.wisconsinbiathlon.com>

Forecast/Conditions: Overnight low in the mid-20s rising to low to mid-30s during races. Calm and partly sunny. Expect the race course to be hard packed manmade snow.

Glidewax: Due to the abrasive man-made snow, apply Performance Blue Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Structure: A universal grind alone or covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
