10:30 A.M. 11K Open Skate and Classic

Mass start, multi-lap likely on the manmade loop

www.laphampeaksnowmaking.org/activities/lapham-loppet/

Forecast/Conditions: Overnight low in the mid-20s rising to low 30s during races. Several inches of new snow expected Friday night and Saturday morning with increasing winds. Expect the race course to have soft fresh snow over a hard base that will break down with lap traffic.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Yellow, corking between layers. Cover with 2 thin layers of GripWax Red to increase speed.

Structure: A universal grind alone or covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
