

WAX RECOMMENDATION

Loopy Loppet

Minocqua Winter Park, Minocqua, WI

Saturday, February 29

6K-18K, Classic or Skate - Skier's Choice

Wave start, 1-3 laps

[Event Website](#)

Forecast/Conditions: Friday night mostly clear, with a low around 1F. Northwest wind 5 to 7 mph becoming calm in the evening. Saturday partly sunny, with race temperatures starting at 12 and rising to 22-25. Expect transformed snow to be machine worked and packed with solid tracks breaking down as the day progresses.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax/HP Red Hot Wax mixed 1:1, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply alternating layers of Nordic GripWax Blue and Base Wax Green, corking between layers. Final layer should be Blue.

Structure: A fine linear grind covered by one pass with the Red Structurite tool after scraping and brushing the HP hot wax layer or before spraying on the HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
