42K Freestyle technique

Mass start

Point to Point (see website for details)

<http://www.methowtrails.org>

Forecast/Conditions: With wet and warm days leading up to event, expect firm and moist conditions with some thin areas with dirt mixed in. Snowpack is fully transformed unless race day snow occurs. Overnight low of 27 rising to around 36 by 1 P.M. with a 50 percent chance of snow.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax/HP Yellow Hot Wax mixed 1:1, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Gripwax: NA

Structure: A universal structure or covering with one pass of the Yellow Structurite tool followed by one pass of the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
