

WAX RECOMMENDATION

Erik Judeen Classic

Korkki Nordic Center, Duluth, MN

Sunday, March 1

11 A.M.

10K, Classic

Mass Start

<http://korkkinordic.org/events.html>

Forecast/Conditions: Overnight low of 20, temperature at start will be 31. Snow will be hardpacked base. Mostly cloudy skies with almost no wind.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Yellow/GripWax Red, alternating colors and corking between layers. Finish with Red under foot. If you want more kick, apply GripWax Yellow only.

Structure: A universal grind covered by one pass with the Red Structurite tool after scraping and brushing the HP layer or before spraying on the HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
