

WAX RECOMMENDATION

TOKO[®]

Michigan Cup Classic Championships

Hanson Hills Recreation Area, Grayling, MI

Sunday, February 16

10 A.M.

14K, Classic

15 second interval start

1 lap

<http://nordicskiracer.com/event-details.asp?id=2945>

Forecast/Conditions: Overnight low of 23 with a 60 percent chance of snow. Temperature at start of 25 rising to 27, with little chance of snow during race. Trail will be machine packed powder.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply four to six thin layers of Nordic GripWax Red, corking between layers. If using skin skis, see our [skins treatment options](#) for best results.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying Liquid Paraffin will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
