Saturday, February 22

10 A.M.

22K, 11K, 6K & 1km (youth), Freestyle technique

6K loops

<https://www.pinedaleaquatic.com/stampede>

Forecast/Conditions: Overnight low in the single digits F, temperature at start low teens, sunny. Fresh, cold powder snow, firmly packed.

Glidewax: Apply Performance Blue Hot Wax, scrape and brush, then apply High Performance Blue Hot Wax, sprinkle on X-cold Powder, iron in together, scrape and brush. For High Performance Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Blue, let sit for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP Liquid Paraffin will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
