Saturday, February 8

10 A.M.

10K, Freestyle technique

Wave starts

2 laps on a 5K loop with shorter distances for youngsters and oldsters

Race info link [here](#)

Forecast/Conditions: Overnight low around 32, temperature at start in the low to mid-30s with mostly sunny skies. The snow will be a mix of icy manmade in the stadium area which will be very firm and fast with natural snow on other parts of the course, which will be slower. Expect very wet semi-transformed snow that is not dirty.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Black Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin.

Structure: A warm universal stone grind structure covered by one pass with the Yellow followed by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying Liquid Paraffin will best suit these conditions.

Created by Barry Makarewicz, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
