

WAX RECOMMENDATION

Wisconsin Biathlon Cup Race #6

Reforestation Camp, Green Bay, WI

Sunday, February 16

10:45 A.M. 10K PPSS Open

11:45 A.M. 8K PPSS Junior and 5K Novice PP

<http://www.wisconsinbiathlon.com>

Forecast/Conditions: Very cold temperatures and fresh snow during the week will make for great conditions with sharp, fine snow. Expect Saturday night low around 16 rising to low 20s during races with partly sunny skies. Expect the race course to be firm but it may break down with lap traffic.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Blue, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Structure: A universal grind alone or covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying Liquid Paraffin will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
