12.5K Men, 10K Women

Individual Modified format

See website for details including WA Cup NF or LF only wax

<http://www.wabiathlon.org>

Forecast/Conditions: With some new snowfall midweek, expect a clean and firm snowpack. Overnight low expected of 28 with a 40 percent chance of light snow falling prior to and during the race. Snow temperature expected near 32 during event.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply Performance or High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin. Topcoats may be added one hour after spraying and brushing HP LP if desired.

Gripwax: NA

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
