5K, Men and Women

Supersprint Format

See website for details including WA Cup NF and LF only

<http://www.wabiathlon.org>

Forecast/Conditions: Early forecasts indicate significant snowfall expected between Saturday evening through race completion Sunday. Overnight low of around 29 rising to 33 at race time. Ski selection could be significant should the bulk of snow occur post grooming.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply Performance or High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin. Additional topcoats may be applied one hour after spraying and brushing HP LP if desired.

Gripwax: NA

Structure: A Wet structure covered by potentially one pass with the Yellow Structurite tool after scraping and brushing final layer of Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
