

WAX RECOMMENDATION

TOKO[®]

Washington Biathlon Association Race 6

Stevens Pass Nordic Center 5 miles east of Stevens Pass, WA

Sunday, 8 March

10:30 A.M. Zeroing, 11:30 A.M. Race

5 K Supersprint format

See website for details incl. WA Cup NF or LF only wax rules

<http://www.wabiathlon.org>

Forecast/Conditions: Overnight low of 21F with cloudy skies predicted with firm and fast conditions. Snow temps of around 30F at race time should make for some fast times.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply Performance or High Performance Yellow Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Red Hot Wax, scrape and brush, then spray on HP Liquid Yellow, let sit in a warm room for at least one hour (overnight is best), polish with the Polishing Brush Liquid Paraffin. Topcoats may be added 1 hour after HP application if desired.

Gripwax: NA

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
