

WAX RECOMMENDATION

Snow Mountain Ranch Stampede

Snow Mountain Ranch, Granby, CO

Sunday, March 15

9 A.M.

50K, 25K, 10K, Classic

Mass start by distance

More info [here](#)

Forecast/Conditions: Overnight low of 16 warming to mid-20s by race start with mostly sunny conditions. Snow will be fast and transformed.

Glidewax: Apply Performance Black Hot Wax, scrape and brush, then apply High Performance Red Hot Wax, scrape and brush. For HP Liquid Paraffin, apply Performance Blue Hot Wax, scrape and brush, then spray on HP Liquid Red, let stand for at least one hour in a warm room (overnight is best), then polish with the Polishing Brush Liquid Paraffin.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green short (in klister zone), cork smooth, let cool. Then create a pyramid of multiple thick layers of Base Wax Green, corking between each layer. Stay short, not beyond klister zone. Finish by covering with a very thin layer of GripWax Blue, corking lightly. More info [here](#)

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the High Performance (Liquid Paraffin or Hot Wax) and substitute the Performance or Base Performance wax of the same color (Yellow, Red or Blue). To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
