This tip is for Saturday/Sunday, December 26 and 27

10K, Freestyle

utahnordic.org/wasatch-citizens-series-race-1/

Forecast/Conditions: Friday overnight low 15 degrees. Saturday 10 A.M. temperature about 26 and warming to a high of 41. There is a 40 percent chance of snow after 11 A.M., perhaps changing to rain after 2 P.M. Saturday. Saturday overnight low of 15. Sunday 10 A.M. temperature about 21 and warming to 33. Snow is entirely manmade and ski conditions are good.

Glidewax: If skiing before 11 A.M. either day, apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush. If skiing after 11 A.M., apply Base Performance Blue, scrape and brush. Spray on Base Performance Red LP, let stand overnight, then polish with Polishing Brush. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply the same color of Hot Wax, scrape and brush.

Structure: A cold universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP LP will best suit these conditions.

Racing – Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
