

WAX RECOMMENDATION

Ski to the Sun Marathon and Relay

Mazama Corral Trailhead, Mazama, WA

Friday, January 29, 1st day of a 9 day virtual event

Self-scheduled event opening days

Wax tip for January 29 and January 30

42K Classic or Free Technique

<http://www.methowtrails.org>

Forecast/Conditions: Snow consists of daily PistenBully groomed, primarily transformed snowpack with some new snow falling in past few days. Road crossing areas will be dirty. Low of 19 (Thursday) and 20 (Friday) expected. Friday expected to be mostly sunny with a high of 31 and Saturday 30 with a 30 percent chance of snow.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue/BP Red Hot Wax mixed 1:1, scrape and brush. If starting after 11 A.M. either day, use BP Red Liquid over BP Red Hot Wax ironed or straight BP Red Hot Wax if you do not have LP spray.

Gripwax: Roughen base with 150 grit sandpaper, iron in a thin layer of Nordic Base Wax Green, cork smooth, let cool and cover with 3 layers of Nordic GripWax Red. Cork smooth and let cool before skiing.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying BP LP will best suit these conditions. Questions about this tip or changing conditions can be addressed to the email below.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
