

WAX RECOMMENDATION

Tuesday Night Lights XC Race Series

Soldier Hollow Nordic Center, Heber City, UT

Tuesday, January 5

7K, free technique (skate)

First wave 5:30 P.M., last wave 7 P.M.

2 x 3.5K loops

<http://utaholympiclegacy.org/event/tuesday-night-lights>

Forecast/Conditions: High Tuesday of 35, temperature at start 20 degrees, new snow on top of clean/fresh manmade snow.

Temperature decreasing to low teens, mostly clear, 60 percent chance of new precipitation earlier in the day.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Blue Hot Wax, scrape and brush.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
