

# WAX RECOMMENDATION

## Pre-Loppet

Theo Wirth Park, Minneapolis, MN

Sunday, January 17

8 A.M. 5K, 8:30 A.M. 15K, Freestyle

Individual starts using pods of 10 skiers

<https://www.loppet.org/events/preloppet>

**Forecast/Conditions:** The forecast calls for 6-12 inches of snow falling on Thursday and Friday, in windy warm conditions and possibly mixed with rain. Saturday overnight low of 18, rising to 20 for the starts. Expect a slight breeze, mostly cloudy with little chance of snow during the race. Course will be PistenBully prepared.

**Glidewax:** Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight, then polish with the Yellow Liquid Paraffin Polishing Brush. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Red Hot Wax, scrape and brush.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP LP will best suit these conditions.

**Racing - Service**

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
