U18 & 20 only, Vermont residents only

10K, Classic

Interval start, 2.2K loop

Event website [here](#)

Forecast/Conditions: Friday overnight low of 28 with a 50 percent chance of snow. Snow temperature at start 32 with a 90 percent chance of rain/snow. Mix of manmade and natural snow.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Spray on Base Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Red Hot Wax, apply BP Yellow Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. While the base wax is still tacky, apply a thin layer of Nordic Klister Yellow and smooth.

Structure: A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Created by Dave Boucher, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
