

WAX RECOMMENDATION

TOKO[®]

Bitterbrush Barnsley Burner

Winthrop Town Trail Head, Winthrop, WA

Monday, February 22, through Sunday, February 28

Self-timed event on a figure 8 loop

Wax tip for February 24 and 25, assumes an 8 A.M.

4.5K and 2K, Classic technique NEW RACE VENUE

<http://www.methowvalleynordic.com>

Forecast/Conditions: A 40", daily groomed by PistenBully, fully transformed snowpack exists on day 3 and 4 of a virtual event. Tuesday night low of 15 rising to a daytime high of 37 Wednesday under sunny skies. Wednesday night low of 21 rising to 37 Thursday as well. A 40 percent chance of moisture falling Wednesday night and Thursday.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue/Red Hot Wax mixed 50/50, scrape and brush.

Gripwax: Fastest times will most likely be recorded double poling on skate skis. If you are not so inclined, roughen base with 150 grit sandpaper, iron in a thin layer of Nordic Base Klister Green, cork smooth, let cool, and cover with Nordic Klister Blue/Red 2/1 ratio. Cork smooth and let cool before skiing.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
