15K, 5K, 2K, 1K, Freestyle Technique

New Course

<http://www.kongsbergers.org>

**Forecast/Conditions:** With a 60" base and a slight break in the storm cycle, the PistenBully should be able to pack a good clean platform from Wednesday on. Overnight lows expected of 29 Friday night and 31 Saturday night with daytime highs expected of 36 Saturday and 40 Sunday. A 60 percent chance of minor snowfall expected daily from Friday on, increasing to 80 percent and rapidly warming early Sunday morning.

**Glidewax:** Apply Base Performance Red Hot Wax, scrape and brush. Spray on Base Performance Yellow Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply Base Performance Yellow Hot Wax, scrape and brush.

**Gripwax:** NA

**Structure:** A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
