

WAX RECOMMENDATION

Ultratune DownDuro

Chickadee Trailhead, Winthrop, WA

Monday, March 1, and Tuesday, March 2

Self-timed downhill event, Opening days

NEW EVENT

Wax tip assumes an 8 A.M. start

Approx 7K, Freestyle technique. See website info at

<http://www.methowvalleynordic.com>

Forecast/Conditions: Clean, fully transformed and firm 44" snowpack groomed daily by PistenBully. Overnight low of 25 Sunday and 23 Monday followed by daytime highs of 37. Insignificant or no amounts of new snow expected, will make this downhill race set some speed records if you choose the best route!

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Red Hot Wax, scrape and brush.

Gripwax: NA

Structure: A universal structure on a stiff ski covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying BP Liquid will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
