

WAX RECOMMENDATION

Polar Bear Nordic Citizen Race

Wood Craft Camp, Old Forge, NY

Sunday, February 7

Noon

6K, Classical technique

Interval start

Event info [here](#)

Forecast/Conditions: Overnight low 11, temperature at start 18. Natural new fallen snow, packed powder, machine groomed surface under cloudy skies. A 50 percent chance of snow throughout the day.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply one layer Nordic GripWax Blue, one layer GripWax Red, and a final layer of GripWax Blue, corking between layers.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
