

WAX RECOMMENDATION **TOKO**[®]

Coloma Ride and Glide

Coloma Village Park, Coloma, WI

Saturday, February 13

13K, Freestyle

Mass start on this two lap course

<https://colomapathfinders.com/events/ride-and-glide/>

Forecast/Conditions: Overnight low of -8F, rising to -3F at the start. Forty percent chance of snow beginning at 12:01 A.M. and continuing throughout the race. Expect sharp wind-blown snow in the open areas. Course will be machine worked.

Glidewax: Apply Base Performance Blue Hot Wax, sprinkle on X-cold Powder, iron in together, let cool, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Yellow Liquid Paraffin Polishing Brush. If you do not have LP spray, apply the first layer of BP Blue Hot Wax without X-cold Powder, then apply a second layer of BP Blue Hot Wax, sprinkle on X-cold Powder, iron in together, let cool, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply additional layers of Nordic GripWax X-Cold, corking between layers. Final layer should be Nordic GripWax Blue underfoot.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
