## Glenville Hills Classic

Glenville Hills, Schenectady, NY

Saturday, February 13

9:30 A.M.

6K and 10K, Classical technique

Interval start

Multiple laps

<https://www.skireg.com/glenville-hills-classic0>

**Forecast/Conditions:** Overnight low zero F, temperature at start 9F. Freshly packed powder, under partly cloudy skies.

**Glidewax:** Apply Base Performance Blue Hot Wax, scrape and brush. Spray on BP LP Blue, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply a second layer of BP Blue Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Blue, corking between layers.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
