

WAX RECOMMENDATION

Potato Cup - Updated!

Mink Creek Nordic Area, Pocatello, ID

Saturday, February 6

11 A.M.

3K/5K/10K/15K, Skate

Mass start

3 laps

WWW.POKYXC.ORG

Forecast/Conditions: New snow throughout week. Friday night low of 27, 31 at start, a 20 percent chance of precipitation Saturday and 15 mph winds. Track may soften up with skier traffic depending on Friday night snowfall. Increased wind will keep snow skiing colder than the temperature might suggest.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Blue/BP Red Hot Wax mixed 1:1, scrape and brush.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
