

WAX RECOMMENDATION

Proctor Freestyle - New Hampshire Cup

Proctor Academy, Andover, NH

Sunday, February 28

10 A.M.

5K, Skate

Interval start

2 laps

<https://nensa.net/eastern-cup-5/>

Forecast/Conditions: Saturday overnight low of 30 with a 30 percent chance of rain/snow. Sunday will be mostly sunny with the temperature at start 32. Expect wet snow.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Spray on Base Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Red Hot Wax, apply BP Yellow Hot Wax, scrape and brush.

Structure: A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
