

WAX RECOMMENDATION

Colorado Biathlon State Champs

Snow Mountain Ranch, Granby, CO

Saturday, February 13

9 A.M. Wave 1 Zero, 9:40 A.M. Start

11 A.M. Wave 2 Zero, 11:25 A.M. Start

Sprint

<https://www.coloradobiathlon.org/schedule.html>

Forecast/Conditions: Overnight low of 12 with snow likely. Air temperature at start in the mid-teens for Wave 1 and mid-20s for Wave 2. Mostly cloudy skies with a chance of snow.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply an additional layer of BP Blue Hot Wax, scrape and brush. Wave 2 can substitute Red Liquid Paraffin.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
