Forecast/Conditions: Overnight low 9F, temperature rising to the upper 20s during the day, partly cloudy. Packed powder snow. Possible snow showers during the day.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply a second layer of BP Blue Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Created by Rob Bradlee, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
