Wax tip for March 15/16, assumes an 8 A.M. start)

Approx 7K, Free technique, Multiple routes

methowvalleynordic.com/event/methow-valley-gr-code-spring-series/

Forecast/Conditions: A 14" to 31" fully transformed snowpack groomed daily on most routes by PistenBully at near freezing temperatures. Overnight lows expected of 31 Sunday night and 29 Monday night with daytime highs of 41 Monday and 45 Tuesday.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Spray on Base Performance Yellow Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax/BP Yellow Hot Wax mixed 1:1, scrape and brush.

Gripwax: NA

Structure: A universal structure covered by one pass with the Red Structurite tool followed by a pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
