

# WAX RECOMMENDATION

## Ultratune DownDuro

Chickadee Trailhead, Winthrop, WA  
Saturday, March 6, and Sunday, March 7  
Self-timed event, Final days  
Wax tip assumes a 7 A.M. start  
Approx. 7K, Freestyle technique  
<http://www.methowvalleynordic.com>

Forecast/Conditions: Clean, fully transformed and firm snow conditions groomed daily by PistenBully. Overnight low of 29 Friday night and 25 Saturday night. Daytime highs of 39 with partly sunny skies. A less than 50 percent chance of snow flurries Friday night. Early start times should be advantageous both days.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Spray on Base Performance Yellow Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Yellow Hot Wax for Saturday and BP Red Hot Wax for Sunday, scrape and brush.

Gripwax: NA

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
