

WAX RECOMMENDATION

TOKO[®]

Michigan Cup Relays

Cross Country Ski Headquarters, Roscommon, MI

Sunday, March 7

11 A.M

3x5K CL-FS-FS

No day of race registration!

Nordicskiracer.com

Forecast/Conditions: Saturday night mostly clear with a low around zero F. Sunday sunny, 28 at start rising to 33 at finish. Expect hard-packed, transformed snow and ice.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Liquid Paraffin Red, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 alternating layers of Nordic GripWax Red and Base Wax Green, corking between layers. Final layer should be Red. For more kick, you can top with 1 layer of Nordic GripWax Yellow.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
