

WAX RECOMMENDATION

Super CXC Cup Regional Finals

Theo Wirth Park, Minneapolis, MN

Friday, March 5

5 P.M., Individual starts

1.3K, Freestyle Sprint prologue

<https://www.loppet.org/events/juniorchampionships>

Forecast/Conditions: Daytime temperature reaching 32 around 9 A.M., rising 40 by noon and remaining above 32 throughout the races. Calm wind. Course will be on manmade snow, prepared by PistenBully but soft. Expect the snow to be heavily transformed and dirty due to the week-long stretch of above freezing temperatures.

Glidewax: Apply Base Performance Blue Hot Wax, iron, let cool, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight, then polish with the Yellow Liquid Paraffin Polishing Brush. If you do not have LP spray, apply a second layer of hot wax using BP Red, iron, let cool, scrape and brush.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Red Structurite tool followed by one pass of the Blue Structurite tool after scraping and brushing the final BP Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
