

# WAX RECOMMENDATION

## North End Classic

Birkie Trail (west end of powerline), Cable, WI

Sunday, March 7

9:30 A.M. 25K Wave 1, 9:45 A.M. 25K Wave 2

10 A.M. 12.5K

Mass start

<http://northendclassic.com>

**Forecast/Conditions:** Overnight low of 27, temperature at start expected to be 32. Snow is wet, and with debris. Expect a high of 48 by the mid-afternoon for late starters and late finishers.

**Glidewax:** Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply an additional layer of BP Blue Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in thin Nordic GripSpray Base Green, cork smooth, let cool. Then apply 1 layer of Nordic Klister Yellow.

**Structure:** A fine structure covered by one pass with the Red Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Created by John Bauer, Toko Tech Team member since 1996.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
