12:30 P.M. - 2 P.M. HS 7K

Skate, Interval start, 1 lap

[Link to event website](#)

Forecast/Conditions: Friday night mostly clear with a low around 14 and calm wind. Saturday sunny, with race temperature 34-43. Calm wind becoming south around 5 mph. Expect highly transformed, dirty, abrasive artificial snow.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Yellow Hot Wax, scrape and brush.

Gripwax: n/a

Structure: A universal structure covered by 1-2 passes with the Yellow Structurite tool after scraping and brushing the final BP Hot Wax or before spraying BP Liquid will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
