

WAX RECOMMENDATION

Super CXC Cup Regional Finals

Theo Wirth Park, Minneapolis, MN

Sunday, March 7

9 A.M. first race

10K freestyle for U18 and older, 5K for U16

Pursuit starts

<https://www.loppet.org/events/juniorchampionships>

Forecast/Conditions: Temperature will not drop below 32 the evening before the race. Temperature at the start forecast to be 40, rising to 55 by noon. Mostly sunny with a 15 mph wind from the south. Course will be 2 laps for shorter distance on manmade snow. Longer races will be three laps on a slightly different course. The snow will be prepared by PistenBully but will be soft. Expect the snow to be heavily transformed and dirty due to the week-long stretch of above freezing temperatures

Glidewax: Apply Base Performance Blue Hot Wax, iron, let cool, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight, then polish with the Yellow Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, iron, let cool, scrape and brush, followed by a layer of BP Red Hot Wax.

Structure: A fine structure covered by one pass with the Red Structurite tool followed by a single pass of the Blue Structurite tool after scraping and brushing the final BP Hot Wax layer will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
