

WAX RECOMMENDATION **TOKO[®]**

Besh Cup #2

Kincaid Park, Anchorage, AK

Sunday, December 19

11 A.M.

Freestyle, Mass start format

5K/10K/15K

<https://www.crosscountryalaska.org/besh-1-2-details>

Forecast/Conditions: Overnight low 10F, partly cloudy. Snow likely in the morning. Temperature at start around 20. Clean snow with high humidity, skies mostly sunny. No new snow expected so it will be well machine worked and well skied fresh new snow.

Glidewax: Apply Performance Blue Hot Wax, scrape and brush. Apply High Performance Blue Hot Wax, scrape and brush. Spray on HP LP Red, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have HP liquid wax, the HP Red Hot wax is an excellent product.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Blue, corking between layers.

Structure: A Medium universal grind structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
