

WAX RECOMMENDATION

Bogus Skiathlon

Bogus Basin, Boise, ID

Saturday, December 18

3 P.M.

1K/6K/10K, Classic and Skate

Mass start

1-2 laps

<https://www.bbnt.ski/race>

Forecast/Conditions: Fresh snow throughout week. Friday night low of 14, Saturday high and start temperature of 22. Mostly cloudy, 70 percent humidity and 5 percent chance of snow.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray High Performance Red Liquid Paraffin on to the polishing side of a Thermo Cork and wipe over the glide zone, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray substitute BP Blue Hot Wax for the HP Blue Hot Wax base, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 1 layer of Nordic GripWax Red, add additional layers as needed.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before applying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
