Gore Ski Bowl, North Creek, NY

Sunday, January 9

10 A.M.

U16 Boys/Girls 4.5K, all others 7.5K, Classic

Multiple laps

<https://www.skireg.com/shenehdehowa-classic-qualifier>

Forecast/Conditions: Overnight low 15, temperature at start 26, manmade snow with fresh powder tilled in. Cloudy skies with new precipitation likely.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on HP LP Red, let stand overnight, then polish with the Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, and then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in a light layer of Nordic Base Wax Green, cork smooth, let cool. Then apply 3 layers of Nordic GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
