Sunday, January 23

Noon

3K, 6K, 10K, 20K, Classic

Wave start

[www.anchoragenordicski.com/amh-anchorage-cup-series/](http://www.anchoragenordicski.com/amh-anchorage-cup-series/)

**Forecast/Conditions:** Saturday night cloudy with a chance of snow. Low 25 to 35. Course will be in good condition with new snow mixed in with the base. Sunday rain and snow likely. High 35 to 45.

**Glidewax:** Apply High Performance Red Hot Wax, scrape and brush. Spray on HP LP Yellow, let stand overnight, then polish with the Polishing Brush Liquid Paraffin.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 thin layers of Nordic GripWax Yellow, corking between layers.

**Structure:** A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Patrick McGownd, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
