

WAX RECOMMENDATION **TOKO**[®]

Boulder Mountain Tour

Galena Lodge, Ketchum, ID

Saturday, February 5

10 A.M.

32K, Skate

Wave start

Point-to-point

<https://bouldermountaintour.com/>

Forecast/Conditions: Overnight low in the low teens rising slightly under mostly sunny skies at start time. Temperature will rise to the mid-20s during the day, with firm and fast track conditions.

Glidewax: Apply two coats of High Performance Blue Hot Wax, scrape and brush well after each application. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply two coats of BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Doug Bernard, Toko Tech Team member.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
