

WAX RECOMMENDATION

Krazy Klassic

Huron Meadows Metropark, Brighton, MI

Sunday, January 9

10 A.M.

8K/12K, Classic

2.4K lap on manmade snow

<http://nordicskiracer.com>

Forecast/Conditions: Temperature rising overnight to a high of 35 at start of race. There is a 50 percent chance of rain/snow expected overnight. Course consists of mostly transformed manmade snow. Mostly cloudy with a 10 percent chance of rain/snow during race.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Red Hot Wax, apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, apply a short, thin layer of Nordic GripSpray Base Green, let cool. Then apply a short layer of Nordic GripSpray Red. If using skin skis, treat skins with Eco Skin Proof. For best performance, apply Eco Skin Proof the day before the event.

Structure: A Universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
